

DESIGN SPECIFICATION

DMS App Ecosystem

Design System & Architecture Specification

1. Color Palette & Design Tokens

The DMS ecosystem uses a cohesive, high-contrast palette. Bright functional colors highlight key statuses, stock numbers, and transaction values, while cool page backdrops ensure readability on mobile screen sizes.

Primary & Brand Accent Colors

Brand Red
#ED1D24
Primary actions, error states, and shortages

Success Green
#00B633
Confirmation, clear status, positive variance

Bidding Orange
#FF6B00
Warning alerts, live counters, quantities

Primary Blue
#0066FF
Information states, SKUs, links

Loyalty Purple
#7A4DFF
Loyalty metrics, brand cards

Dark Navy Selection
#121726
Active control selectors, dark text headers

Theme Variables (Bottom Navigation)

Variable Token Name	Light Mode Value	Dark Mode Value	Description
Background/Main-bg	#FFFFFF	#272A32	Canvas and bottom navigation bar panels
Label & Icon Default	#5E5F60	#9E9E9E	Default color for unselected navigation options
Label & Icon Active	#00AA5B	#00AA5B	Vibrant green accent indicating active selection

2. Typography & Hierarchical Scale

The interface standardizes on the **Poppins** typeface for geometric precision and clarity across mobile screens. System symbols and localization strings use **Inter** or **SF Pro** respectively.

Role	Font Family	Weight & Style	Size (Pixels)	Context & Examples
Large Numeric Metrics	Poppins	Bold	20px - 24px	Financial outstanding balances, large statistics (e.g. 97.5% Accuracy)
Section Headers	Poppins	SemiBold	16px - 18px	Screen title headers (e.g. Stock Take, More Actions)
Card Titles & Products	Poppins	Bold / SemiBold	14px - 15px	Tyre product brand names, selection action cards (e.g. By Brands)
Card Values & Inputs	Poppins	Medium / Regular	11px - 13px	Quantity input values, stepper controls, form field helper labels
Timestamps & Alerts	Poppins	Medium	8px - 10px	Audit intervals (e.g. Last audited: Yesterday), category items count

3. Layout & Spatial Radii

Stocktick and DMS modules operate on a responsive **Mobile Grid** designed for screen widths between **401px and 412px**, featuring a standard outer margin of **16px**. Desktop dashboard components are built for **1440px wide screens**.

Standard Corner Radii Guide

- **Small Details (Status Badges, Stepper Buttons):** 4px - 8px
- **Standard Cards & Action Buttons:** 12px - 16px
- **Bottom Sheet Drawer Panels:** 24px - 32px (Mixed top corners)
- **Illustrative Avatar Circles:** 40px+

4. Page Architectural Breakdown

The Figma document describes an integrated ecosystem for tyre store managers and relationship managers, mapped across 10 main pages:

1. DMS Home Page ("DMS HOME PAGE")

Canvas ID: 6256:44

The primary landing page welcoming users as *"Hello, Tyre Czar"*. Supports regional translations (Kannada, Tamil, Telugu, Malayalam). Launches core operations: **Buy Tyres**, **Manage Store**, **Pay**, and **Sell Tyres**.

2. Inventory Dashboard ("inventory design final")

Canvas ID: 2534:91

Comprehensive lists of in-hand stock filterable by vehicle category (Car, Bike, CV) and conditions (New, Used, Retread). Contains multi-step forms to add invoice items.

3. Stock Take Flow ("Stocktick")

Canvas ID: 11358:1246

Physical audit module grouped by vehicle category or tyre brand. Features expected quantity comparisons, inline count confirm steppers, discrepancy logs, and a success confirmation overlay.

4. Ask Quote Bidding ("Ask_Quote_Dms")

Canvas ID: 4906:2

B2B buying interface showing active live order bid collections, item variant sheets, cash splitting panels, and countdown timers.

5. Supplier Pricing ("Supplier_tp_dms")

Canvas ID: 4025:36

Suppliers' bidding interface showing incoming quote notifications, pricing forms, rejection reason inputs, and bid approvals.

6. Reward Tiers ("Reward_screen")

Canvas ID: 3775:537

Gamification layout detailing loyalty milestone badges (Silver, Gold, Platinum benefits) and reward earnings logs.

7. Order History & Outstandings ("DMS ORDER HISTORY")

Canvas ID: 6453:348

Outstanding dues panel showing full/custom payment inputs, scheduled payment widgets, and bank confirmation cards.

8. Relationship Manager App ("RM APP")

Canvas ID: 1190:65

App version for relationship managers. Features credit note claims (CN records), warranty raises, and dealer directories.

9. Next.js Desktop Dashboard ("Next js dashboard")

Canvas ID: 3175:1229

Desktop web portal displaying statistics cards (Requests - 25, Quote Sent - 8623), list tables, and dual column layout grids.

5. Codebase vs. Figma Alignment Gap Analysis

 Essential Adjustments Needed

Several styling discrepancies exist between the current codebase `src/App.tsx` and the official Figma specs. Fixing these will align the build with the premium brand aesthetic.

Category	Current Code Implementation	Figma Design Specification	Recommendation
Typography	Imports and renders <code>Plus Jakarta Sans</code>	Uses <code>Poppins</code> for UI and numbers	Update CSS font imports to <code>Poppins</code>
Brand Colors	Uses Tailwind defaults (e.g. <code>bg-red-500</code>)	Uses specific brand colors (e.g. Brand Red <code>#ED1D24</code>)	Map exact brand colors in Tailwind theme extend configurations
Icons & Assets	Displays platform-dependent native emojis	Relies on custom vectors and unified emoji styles	Standardize emojis by replacing them with custom vector SVGs

6. Premium Design Recommendations

Implementing these visual suggestions will ensure the DMS application looks state-of-the-art:

- **Glassmorphic Drawers:** Enable `backdrop-filter: blur(12px)` with a semi-transparent white background (`rgba(255,255,255,0.85)`) on bottom sheet headers.
- **Tactile Presses:** Add scale-down spring motions on steppers (`scale: 0.95`) when users click the count increment buttons.
- **Blinking Live Bids:** Apply subtle pulse keyframe animations on the active bid countdown badge in the Ask Quote page.
- **Tier Elevation Celebrations:** Use lightweight particle effects (confetti canvases) when store managers unlock new Gold/Platinum tier benefits.
